

FILTER SERVICE KIT

Take the guess work out of your maintenance intervals, maximize filter performance and simplify service of your filtration system with these **Filter Service Kits**. Versions are available for use with QFP Series Bag and Multi-Round Cartridge housings.

Kits Include;

Pressure Gauges

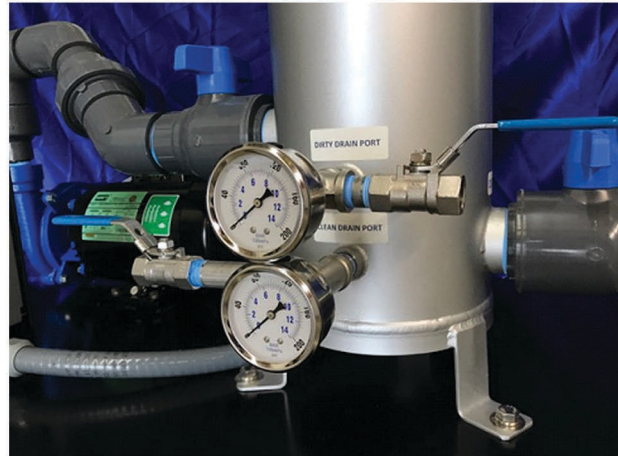

Pressure gauges on the inlet and outlet of the filter housing are used to determine when the cartridges are dirty and need to be replaced.

Drain Valves

Drain fluid from housing when servicing.

Air Purge / Pressure Relief

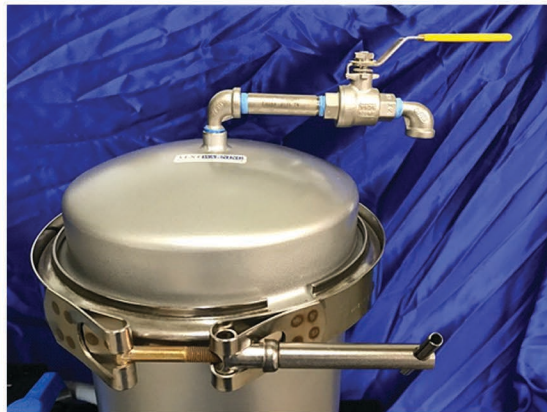

Purge air from housing when starting up to ensure 100% of the filter media is utilized. Relieve pressure and aid draining of housing when servicing.

Pressure Gauges and Drain Valves

Result of not purging air

Air Purge / Pressure Relief
